

GW290

Solar Wall Light with LED Flicker

Information For Use

THANK YOU FOR PURCHASING THE SOLAR WALL LIGHT WITH FLICKER LED FROM GARDENWIZE. THE INSTRUCTIONS WRITTEN BELOW PROVIDES YOU WITH GUIDANCE ON HOW TO BEST USE THE PRODUCT. WE HIGHLY ADVISE THAT YOU READ THESE INSTRUCTIONS BEFORE USING THE PRODUCT.

THIS PRODUCT IS DESIGNED FOR OUTDOOR USE AND TO BE MOUNTED TO A WALL. PLEASE MAKE SURE THE PRODUCT IS INSTALLED ON A WALL WHERE THE SOLAR PANEL ON THE TOP WILL GET DIRECT SUNLIGHT.

Product Elements

1. Gardenwize Solar Wall Light With Flicker LED
2. Wall mount screws/fixings

How it Works

This wall light comes with a solar panel on the top of the unit. This solar panel absorbs sunlight to recharge the included rechargeable batteries. The Flicker LED light in the wall light automatically turns on at night.

Where to Place This Solar Wall Light?

The solar panel on this wall MUST be under DIRECT SUNLIGHT in order for the battery to charge.

We highly advise to avoid positioning the solar light where there is a lot of shade or there is low light as this will prevent the battery from getting charged. And we also advise to not position the light near sources of artificial light that come on at night such as street lights as this will affect performance of light.

Other factors such as weather conditions and the number of hours of daylight will also affect the performance as well.

Wall Mount Instructions

This solar wall light comes pre-assembled. To mount to a wall, please follow the instructions below:

3. Find a suitable wall for mounting the solar light. Ensure this location will allow for the solar panel to get enough sunlight for the solar panel.
4. Using the wall light, position it on the wall and use a suitable marker pen to mark where you are going to drill the holes.
5. Drill the holes using a masonry drill bit (not included).
6. Insert the provided plugs into the newly drilled holes.
7. Position the wall light over the holes, and screw in the place using the provided screws.

On First Use

These solar string lights come with a solar panel with a built-in rechargeable battery. Before using this product, we advise that you fully charge the battery by placing the solar panel under direct sunlight for a full 24 hour period.

Maintenance & Troubleshooting

- Make sure the switch is set to the “ON” position.
- Keep the solar panel clean.
- If a solar product does not light up after it has been used for around 8 – 12 months, replace the rechargeable battery as it may be weak or worn out. (Battery 1 pc “AA” 1.2v 800Mah, Ni-MH, Rechargeable). Never use another battery with a different spec.

Battery Replacement

1. Unscrew the battery compartment cover by using a Phillips head screwdriver (not included).
2. Open the compartment carefully and ensure that the battery terminals are not damaged.
3. Remove the old depleted battery and replace with 1 x new AA rechargeable battery.
4. Secure the battery compartment in place using the screws

Health & Safety

- Do not use the lights if the insulation or bulb have been damaged.
- Never allow the product to come into contact with excessive heat or naked flame.
- This product is not a toy. Keep away from pets and children, ensuring that children are supervised at all times.
- When disposing of this product, please do so in line with your local authority guidelines.
