Garden

Solar Obelisk Topiary

Information for use _____

Thank you for purchasing the solar obelisk from Streetwize. This artificial garden plant comes with 100 LED solar string lights which will need to be manually added to the product.

The instructions written below provide you with guidance on how to get best use of the product. We highly advise that you read these instructions before using the product.

Before First Use

Remove the protective film from the solar panel.

Assembly

1. Carefully remove the solar garden product along with the solar string lights, ground spike and cable ties from its packaging.
 2. Position the solar garden product in a suitable place in your garden, where the solar panel can get direct sunlight.
 3. With solar string lights, carefully unravel them. Take extra care not to overstretch the string lights.
 4. With the cable ties, attach the string lights to the solar product.
 5. Once the string lights are in place, attach the ground spike to the solar panel.
 6. Then, firmly push the solar panel into soft ground via the ground spike.
-

Charging & Operation

1. Locate the “on/off” switch. This is situated on the reverse side of the solar panel case.
2. Set the switch to the “ON” position.
3. Charge the solar product by placing it under direct sunlight for at least 8 hours.
4. The light will come on automatically at night. It will charge under direct sunlight during the day time and illuminate at night.

NOTE: In order to test the light simply cover the solar panel with your hand and the light should turn on automatically.

Operating the Solar Lights

To enable the solar string lights to automatically come on at night, set the switch located at the back of the unit to 'ON'. You can test if the lights come on by covering the solar panel.

These solar string lights come with 8 light settings. To select your desired light setting, simply press the 'MODE' button to change the light settings. Table 1 below shows all the light settings, and what order they appear in when pressing the mode button.

Order	Mode
1.	Combination
2.	In Wave
3.	Sequential
4.	Slow glow
5.	Chaser flashing
6.	Slow glow
7.	Twinkle flashing
8.	Steady on

Maintenance and troubleshooting

1. Make sure the switch is set to the "ON" position.
2. Keep the solar panel clean.
3. If a solar product does not light up after it has been used for around 8 – 12 months, replace the rechargeable battery as it may be weak or worn out. (Battery 1x AA 1.2V 600mAh, Ni-MH, Rechargeable). Never use another battery with a different specification.

Battery Replacement

1. Unscrew the battery compartment cover by using a Phillips head screwdriver (not included).
2. Open the compartment carefully and ensure that the battery terminals are not damaged.
3. Remove the old depleted battery and replace with 1 x new AA rechargeable battery (1.2V 600mAh, Ni-MH, Rechargeable).
4. Secure the battery compartment in place using the screws.

Attention: Batteries must be recycled or disposed of in accordance with your local authority guidelines. Do not dispose of these near an exposed heat source or open flame or into your normal household waste. Remove the battery from the product if it is to be stored for a long period of time. Removal and/or replacement of the battery should only be carried out by an adult or under adult supervision.

Health & Safety

- Do not use the lights if the insulation or bulb have been damaged.
- Never allow the product to come into contact with excessive heat or naked flame.
- This product is not a toy. Keep away from pets and children, ensuring that children are supervised at all times.
- When disposing of this product, please do so in line with your local authority guidelines.
