Solar Red Flower Trellis

Information for use _____

Thank you for purchasing this product from Gardenwize. The instructions written below provides you with guidance on how to get best use of the product. We highly advise that you read these instructions before using the product.

What's In The Box?

- Trellis
 - Solar panel
 - Cable ties (35)
-

How It Works?

This product is designed to be mounted to your garden's wall or fence. It comes supplied with solar string lights that are powered by an external solar panel as well as clips to secure the solar string light in place.

During the day, the string light's solar panel absorbs solar energy which gets stored in the rechargeable battery. At night, the LED lights of this solar string light will illuminate using this stored energy, bringing charm and personality to your garden area.

On First Use

Before using this product, remove the protective film from the solar panel.

We also advise that you fully charge the battery by placing the solar panel under direct sunlight for a full 24 hour period.

Assembly

1. Carefully remove the product from its packaging.
 2. Find a suitable position where you can mount the trellis. Please ensure the string lights' solar panel can get direct sunlight.
 3. Expand the trellis and mount it to either your fence or wall in your garden. You will need suitable fixings (i.e. nails/screws - not included)) to mount the trellis.
 4. With the string lights and supplied clips, secure the string lights to the trellis.
 5. Position the solar light in a suitable position.
-

Where to position the solar panel

The solar panel **MUST** be under **DIRECT SUNLIGHT** in order for the battery to charge.

We highly advise to avoid positioning the solar panel where there is a lot of shade or there is low light as this will prevent the battery from getting charged. And we also advise to not position the light near sources of artificial light that come on at night such as street lights as this will affect performance of light.

Other factors such as weather conditions and the number of hours of daylight will also affect the performance as well.

Usage Instructions

This solar string light comes with two light functions. There is the Steady light mode and there is the Flashing light mode.

You can set the which function you would like via the switch located on the reverse side of the solar panel

For Steady mode, set the switch to “S”

For Flashing mode, set the switch to “F”

To switch off, set the switch to “OFF”

Along with solar string, when closed, the trellis is 1.2m with the enclosed cable ties (35 in total). Please attach solar string light to suit for full coverage, we advise to attached every 30cm. Once this is done, please place the solar panel where it will get optimum sunlight. Allow to charge for first 48 hours then switch on and when dark, will automatically turn on. Trellis total size when open is 200cm wide and 80cm high fully extended. All sizes approximate.

Maintenance & Troubleshooting

- Make sure the switch is set to either “S” or “F” position.
 - Keep the solar panel clean.
 - If a solar product does not light up after it has been used for around 8 – 12 months, replace the rechargeable battery as it may be weak or worn out. (Battery 1 pc “AA” 1.2V 800Mah, Ni-MH, Rechargeable).
-

ATTENTION: Batteries must be recycled or disposed of in accordance with your local authority guidelines. Do not dispose of these near an exposed heat source or open flame or into your normal household waste. Remove the battery from the product if it is to be stored for a long period of time. Removal and/or replacement of the battery should only be carried out by an adult or under adult supervision.

Health & Safety

- Do not use the lights if the insulation or bulb have been damaged.
- Never allow the product to come into contact with excessive heat or naked flame.
- This product is not a toy. Keep away from pets and children, ensuring that children are supervised at all times.
- When disposing of this product, please do so in line with your local authority guidelines.
