

GW428

3 in 1 Solar Double Headlamp

Information for use _____

Thank you for purchasing this solar product from Gardenwize. This product has been specially designed to be used in three different ways. You can mount this solar light on your wall, use it as a pathway stake light or as a lamp post.

The instructions written below provide you with guidance on how to best use the product. We highly advise that you read these instructions before using the product.

Product Elements

- Solar lamps x 2
 - 8 x pole pieces
 - Wall mount bracket (2 piece)
 - Ground spike attachment
 - Twin lamp holder
 - Lamp fixing x 2
 - Top pole piece
 - Wall mount screws/fixings
 - Nut and bolt for wall mount bracket
-

How It Works?

This product comes with solar panels situated at the top of the light. During the day, the solar panels absorb sunlight to recharge the included battery. At night, the LED light comes on to provide a dazzling illumination.

Where to Place This Solar Light?

The solar panels on this product MUST be under DIRECT SUNLIGHT in order for the battery to charge.

We highly advise to avoid positioning the solar light where there is a lot of shade or there is low light as this will prevent the battery from getting charged. And we also advise to not position the light near sources of artificial light that come on at night such as street lights as this will affect performance of light.

Other factors such as weather conditions and the number of hours of daylight will also affect the performance as well.

Assembly Instructions

The solar light can be used in three different ways, but the actual lamp assembly is the same. In this section, we'll go through the lamp assembly first, followed by the three mounting options.

LAMP ASSEMBLY

1. To assemble the twin solar lamp, first get both the solar lamps
2. Get the two lamp fixings, and secure each one of them to the bottom of both solar lamps
3. Then, secure both lamps to the twin solar lamp holder

WALL MOUNT

1. Assemble the wall mount bracket using the supplied nut and bolt.
2. Attach the wall bracket to the lantern.
3. Find a suitable wall for mounting the solar light. Ensure this location will allow for the solar panel to get enough sunlight for the solar panel.
4. Using the wall light, position it on the wall and mark where you are going to drill the holes.

5. Drill the holes using a masonry drill bit (not included).
6. Insert the provided plugs into the newly drilled holes.
7. Position the wall light over the holes, and screw in the place using the provided screws.

PATHWAY GROUND SPIKE (FLOWER/GARDEN BED)

1. Get one of the pole pieces.
2. Attach the ground spike to the bottom of the pole piece.
3. On the other end of the pole, place the top pole piece.
4. Attach the twin lamp to the stake.
5. Position the lantern in your garden/flower bed by pushing the ground spike into soft ground.

LAMP POST GROUND SPIKE

1. Get all 8 pieces of the pole.
2. Assemble them together.
3. Attach the ground spike to the bottom of the pole piece.
4. On the other end of the pole, place the top pole piece.
5. Attach the twin lamp to the pole.
6. Position the lantern in your garden/flower bed by pushing the ground spike into the ground.

On First Use

This solar light comes with a solar panel with a built-in rechargeable battery. Before using this product, we advise that you fully charge the battery by placing the solar panel under direct sunlight for a full 24 hour period.

Turning On/Off

To turn on both solar lights, remove the lid of both solar lamps and locate the switch. Set the switch for both products to “ON”.

Maintenance & Troubleshooting

- Make sure the switch is set to “ON”.
- Keep the solar panel clean.
- If a solar product does not light up after it has been used for around 8 – 12 months, replace the rechargeable battery as it may be weak or worn out. (Battery 1x AA 1.2V 400mAh Ni-MH Rechargeable). Never use another battery with a different spec.

Battery Replacement

1. Unscrew the battery compartment cover (found at the base) by using a Phillips head screwdriver (not included).
2. Open the compartment carefully and ensure that the battery terminals are not damaged.
3. Remove the old depleted battery and replace with 1 x new AA rechargeable battery.
4. Secure the battery compartment in place using the screws.

ATTENTION: Batteries must be recycled or disposed of in accordance with your local authority guidelines. Do not dispose of these near an exposed heat source or open flame or into your normal household waste. Remove the battery from the product if it is to be stored for a long period of time. Removal and/or replacement of the battery should only be carried out by an adult or under adult supervision.

Health & Safety

- Do not use the lights if the insulation or bulb have been damaged.
- Never allow the product to come into contact with excessive heat or naked flame.
- This product is not a toy. Keep away from pets and children, ensuring that children are supervised at all times.
- When disposing of this product, please do so in line with your local authority guidelines.
