# Solar Gonk Light Welcome Sign

Information for use \_\_\_\_\_

**Thank you for purchasing this product from Streetwize Garden. The instructions written below provides you with guidance on how to get best use of the product. We highly advise that you read these instructions before using the product.**

---

## **How It Works?**

This Gnome with Lantern light comes with an external solar panel that has a built-in rechargeable battery. During the day, this solar panel absorbs solar energy which gets stored in the rechargeable battery. At night, the LED lights of this solar string light will illuminate using this stored energy, bringing charm and personality to your garden area.

---

## **On First Use**

Before using this product, remove the protective film from the solar panel. We also advise that you fully charge the battery by placing the solar panel under direct sunlight for a full 24 hour period.

---

## **Assembly**

1. Carefully remove the product from its packaging.
  2. Attach the ground spike to the solar panel.
  3. Push the ground spike into your garden bed.
- 

## **Where to Position The Solar Panel**

The solar panel **MUST** be under **DIRECT SUNLIGHT** in order for the battery to charge.

We highly advise to avoid positioning the solar panel where there is a lot of shade or there is low light as this will prevent the battery from getting charged. And we also advise to not position the light near sources of artificial light that come on at night such as street lights as this will affect performance of light.

Other factors such as weather conditions and the number of hours of daylight will also affect the performance as well.

---

## Usage Instructions

1. Turn the switch which is located on the solar lantern to "ON" position. Charge the solar product by placing it under direct sunlight for at least 8 hours. Recommend to charge longer time for the first-time use.
2. The light will work automatically. It will automatically charge under direct sunlight during the day time and illuminate at night.

**Please Note:** In order to verify that the switch is correctly in the "ON" position, cover the solar panel with your hand and light will light up automatically.

---

## Maintenance & Troubleshooting

- Make sure the switch is set on the "ON" position
- Keep the solar panel clean.
- If a solar product does not light up after it has been used for around 8 – 12 months, replace the rechargeable battery as it may be weak or worn out. (Battery 1 pc AA 1.2V 300mAh Ni-MH Rechargeable). Never use another battery with a different spec.

---

## Battery Replacement

1. First turn "OFF" the lights.
2. Remove battery compartment cover.
3. Remove the exhausted battery and install 1pc new AA 1.2V 300mAh Ni-MH rechargeable battery according to the +/- polarity as figure opposite.
4. Replace battery compartment cover and make sure it is properly sealed.

---

**ATTENTION:** Batteries must be recycled or disposed of in accordance with your local authority guidelines. Do not dispose of these near an exposed heat source or open flame or into your normal household waste. Remove the battery from the product if it is to be stored for a long period of time. Removal and/or replacement of the battery should only be carried out by an adult or under adult supervision.

## Health & Safety

- Do not use the lights if the insulation or bulb have been damaged.
- Never allow the product to come into contact with excessive heat or naked flame.
- This product is not a toy. Keep away from pets and children, ensuring that children are supervised at all times.
- When disposing of this product, please do so in line with your local authority guidelines.
