Solar Watering Can Stake Light

Information for use _____

Thank you for purchasing this product from Streetwize Garden. The instructions written below provides you with guidance on how to get best use of the product. We highly advise that you read these instructions before using the product.

Before First Use

Remove the protective film from the solar panel.

Assembly

1. Carefully remove the product from its packaging.
2. Find a suitable place to position this stake light in your garden. Please ensure the solar panel on this stake light can get direct sunlight.
3. Attach the stake to the light.

Position the stake light into soft ground by gently pushing the stake light into the ground. **IMPORTANT:** Use your hands to push the stake light into ground, never use a hammer or excessive force as this will damage the product.

Charging & Operation

1. The “on/off” switch is situated at the top of the solar panel case. To access the switch, remove the watering can case. Here you will find the switch.
2. Set the switch to the “ON” position. Then replace the watering can and position the light in a sunny location.
3. Charge the solar product by placing it under direct sunlight for at least 8 hours.
4. The light will come on automatically at night. It will charge under direct sunlight during the day time and illuminate at night.

NOTE: In order to test the light simply cover the solar panel with your hand and the light should turn on automatically.

Important

1. Install the solar product in an area where it can get direct sunlight.
2. Leave the switch to the “ON” position.
3. Place the solar light in a location that is away from other light sources at night, such as street lights. Artificial lighting may prevent the product from turning on automatically at night.
4. Duration of solar light illumination depends on the solar product’s level of sunlight exposure, geographical location, weather conditions and the hours of daylight.

Maintenance and troubleshooting

1. Make sure you have pulled out the plastic tab.
2. Keep the solar panel clean.
3. If a solar product does not light up after it has been used for around 8 – 12 months, replace the rechargeable battery as it may be weak or worn out. (Battery 1 pc 600MAh, Ni-MH, Rechargeable). Never use another battery with a different spec.

Battery Replacement

1. Locate the battery compartment.
2. Unscrew the battery compartment cover by using a Phillips head screwdriver (not included).
3. Open the compartment carefully and ensure that the battery terminals are not damaged.
4. Remove the old depleted battery and replace it with 1 x new rechargeable battery.
5. Secure the battery compartment in place using the screws.

Attention: Batteries must be recycled or disposed of in accordance with your local authority guidelines. Do not dispose of these near an exposed heat source or open flame or into your normal household waste. Remove the battery from the product if it is to be stored for a long period of time. Removal and/or replacement of the battery should only be carried out by an adult or under adult supervision.

Health & Safety

- Do not use the lights if the insulation or bulb have been damaged.
- Never allow the product to come into contact with excessive heat or naked flame.
- This product is not a toy. Keep away from pets and children, ensuring that children are supervised at all times.
- When disposing of this product, please do so in line with your local authority guidelines.
