

Solar Caged Mini Lanterns (Pack of 4)

Thank you for purchasing this pack of 4 Solar Caged Mini Lanterns from Streetwize Garden. The instructions written below provides you with guidance on how to get best use of the product. We highly advise that you read these instructions before using the product.

These solar lights come with a solar panel situated at the top. During the day, the panel absorbs solar energy to charge the included rechargeable battery. At night, the LED light in each of the hanging lights automatically illuminates to provide a dazzling display.

Before using this product, we advise that you fully charge the battery by placing the solar panel under direct sunlight for a full 24 hour period.

Where To Put The Solar Light

This product is designed to be hung. When doing so, the solar panel MUST be under DIRECT SUNLIGHT in order for the battery to charge.

We highly advise to avoid positioning the solar panel where there is a lot of shade or there is low light as this will prevent the battery from getting charged. And we also advise to not position the light near sources of artificial light that come on at night such as street lights as this will affect performance of the light.

Other factors such as weather conditions and the number of hours of daylight will also affect the performance as well.

Turning On The Solar Light

1. There is an “on/off” switch at the back of the solar pane case, Take out solar panel and find switch at the back of solar panel box, Then Push the switch to “on” position. Then position the light in a sunny location. Charge the solar product by placing it under direct sunlight for at least 8 hours.
2. The light will work automatically. It will charge under direct sunlight during the day time and illuminate at night.

PLEASE NOTE: In order to test the lights simply cover the solar panel with your hand and the light should turn on automatically.

Maintenance & Troubleshooting

1. Make sure the switch is set to the “ON” position.
2. Keep the solar panel clean.
3. If a solar product does not light up after it has been used for around 8 – 12 months, replace the rechargeable battery as it may be weak or worn out. (Battery 1 pc AAA 200mAh NI-MH 1.2V, Rechargeable). Never use another battery with a different spec.

Battery replacement

Step 1:

Unscrew the battery compartment cover by using a Phillips head screwdriver (not included).

Step 2:

Remove the exhausted battery and install 1 pc new AAA 200mAh NI-MH 1.2V, Rechargeable battery according to the +/- polarity as below image. Open the compartment carefully and ensure that wire inside the battery terminals is not damaged.

Step 3:

Replace battery compartment cover, screw it back into position and make sure it is properly sealed.

Health & Safety

- Do not use the lights if the insulation or bulb have been damaged.
 - Never allow the product to come into contact with excessive heat or naked flame.
 - This product is not a toy. Keep away from pets and children, ensuring that children are supervised at all times.
 - When disposing of this product, please do so in line with your local authority guidelines.
-

Attention: Batteries must be recycled or disposed of in accordance with your local authority guidelines. Do not dispose of these near an exposed heat source or open flame or into your normal household waste. Remove the battery from the product if it is to be stored for a long period of time. Removal and/or replacement of the battery should only be carried out by an adult or under adult supervision.
