

GW632

Pair of Solar Table Lights

Thank you for purchasing this Pair of Solar Table Lights from Streetwize Garden. The instructions written below provide you with guidance on how to get the best use out of the product. We highly recommend reading these instructions before using the product.

Assembly Instructions

1. Remove the protective film from the solar panels.
-

Charging & Operation

These table lights come with a solar panel. During the day, the panel absorbs solar energy to charge the included rechargeable battery. At night, the LED light automatically illuminates.

Before using this product for the first time, we advise that you fully charge the battery by placing the light under direct sunlight for a full 24 hour period.

1. There is an ON/OFF switch at the top of the light, press to switch "ON". Then position the light in a sunny location.
2. Charge the solar product by placing it under direct sunlight for at least 8 hours. Alternatively the solar lights can also be charged via the USB cable included.
3. Press the switch to choose a brightness (Dim, Low or High). In Low or High mode the lamp will illuminate all the time, even in the day or near ambient light.

NOTE: In order to test the light simply cover the solar panel with your hand and the light should turn on automatically.

Important

1. Install the solar product in an area where it can get direct sunlight.
2. Ensure the lamp is turned on.
3. Place the solar light in a location that is away from other light sources at night, such as street lights. Artificial lighting may prevent the product from turning on automatically at night.
4. Duration of solar light illumination depends on the solar product's level of sunlight exposure, geographical location, weather conditions and the hours of daylight.

Maintenance & Troubleshooting

1. Make sure you have pressed the button on top of the light to switch on.
 2. Keep the solar panel clean using a damp cloth or paper towel.
-

Health & Safety

- Do not use the device if the insulation or bulb are damaged.
 - Never allow the product to come into contact with excessive heat or naked flame.
 - This product is not intended for use by children or individuals with reduced physical, sensory, or mental capabilities unless supervised by a responsible adult. Small parts may present a choking hazard. Always keep out of reach of children.
 - When disposing of this product, please do so in line with your local authority guidelines.
-

Battery Replacement

1. NOTE: The solar lights contain 2x built-in 3.7V 14500 400mAh Li-ion batteries in each light, that are non replaceable.
2. Please do not attempt to replace battery, as it will cause permanent damage.

Attention: Batteries must be recycled or disposed of in accordance with your local authority guidelines. Do not dispose of these near an exposed heat source, an open flame, or in your normal household waste.
